Access possibility

Remove the barriers to signature style whether in a country manor, urban townhome or penthouse condo

Small footprint Big impact

Combine stunning aesthetics with the convenience of skipping the stairs. The Savaria Vuelift Mini residential elevator is a showcase element that adds value to a home. With its small footprint and integrated hoistway, it's an easy addition to design plans for new builds and remarkably flexible for retrofitting into an existing home. The Vuelift Mini's sleek circular design lets you live outside the box.

Available in UV-resistant clear glass or acrylic to allow natural light to shine through, the incredible clarity of the cab means the 360-degree view from inside the lift is as impactful as the exterior design. Customizable, powder-coated frame colors let you reflect personal taste and complement interior décor. And thanks to its quiet operation, you can hear conversations – not the elevator.

Most new homes already include high-end appliances, stone countertops and heated bathroom floors. The Vuelift Mini elevates your home as a stunningly beautiful feature that also helps make the home more livable.

Flexible by design

Make fantastic use of otherwise wasted space. Thanks to its integrated hoistway, you can place the Vuelift Mini close to a wall, in a corner, in the middle of an open-concept living space or centered in a winding or circular staircase. It takes up seven- to ten-square-feet less room than a traditional residential elevator with its space-saving 50-inch diameter footprint.

That incredible flexibility also makes it easier to install in existing homes with little disruption. The unit can be wired from either the top or the bottom of the integrated hoistway to fit available space and provide easy access for servicing, and the controller can be placed up to 100 feet away from the unit.

It also allows flexibility of lifestyle, now and in the future. Incorporating Vuelift Mini into a home means greater convenience, enhanced mobility and aging-in-place options for those who find stairs difficult to navigate.

Step into attainable luxury

Live elegantly. Spend wisely. The Vuelift Mini offers more beauty, more convenience and more versatility, yet its installed cost is comparable to traditional residential elevators with similar features. That means you can add significant value without adding significant cost to the project.

The key is its all-in-one installation. There is no need to build a hoistway, because it's already engineered into the integrated design of the Vuelift Mini. That means reduced construction cost, reduced trades management and a smaller square footage requirement. Even when retrofitting existing homes, installation can be completed in weeks with minimal disruption – compared to the months often required to retrofit a traditional residential elevator.

The Vuelift Mini also offers low maintenance costs, with a twice-a-year service schedule to ensure optimal safety and reliability.

Mini

The **Vuelift Mini** is available in silica glass or clear acrylic. The hoistway, manual sliding car gate and manual landing doors are matched in glass or acrylic. Illuminated push-button hall call stations and cab operating panel with integrated touch-pad phone, automatic on/off LED cab lighting and ventilation fan are also included. The standard unit is finished with black powder-coated framing.

Safety features include an emergency stop switch, safety brakes, overspeed governor, manual lowering and emergency battery back-up for cab lighting and lowering.

Optional features include: straight-through cab configuration (2 doors), up to six stops, frame colors including white, silver or custom powder-coat. The Savaria Vuelift Mini includes a 3-year manufacturer's parts warranty, ask your dealer for full details. Architectural drawings and a planning guide are available at vuelift.com.

Specifications

Code compliance	Meets or exceeds ASME A17.1/CSA B44 requirements
Footprint	49.75 in (1.26 m) diameter
Capacity	500 lb (227 kg)
Overhead clearance	96 in (2.44 m)
Cab dimensions	Interior height: 78 in (1.98 m), floor area: 8.25 sq ft (0.76 sq m)
Pit depth	3 in (76 mm)
Maximum travel	50 ft (15.24 m), up to 6 stops
Travel speed	30 ft/min (0.15 m/s)
Drive	Winding drum, with .7 HP motor
Power supply	30A, 230V, single-phase, 50/60 Hz
Configuration	Type 1 (1 cab door), optional Type 2 (2 cab doors)
Color	Black (standard), optional: white, silver or custom powder coat
